W Studio

Sound Bar System with Wireless Streaming

The W Studio sound bar system is Definitive Technology's flagship wireless soundbar that perfectly blends high-performance theater sound with hi-resolution musical reproduction. The W Studio's purposefully slim design (only 3.5" deep) is only overshadowed by its fit and finish, featuring solid aluminum end caps. The W Studio uses Definitive Technology's proprietary Spatial Array technology that aids in creating a high-definition, room-filling 5.1 channel surround sound experience. The compact wireless subwoofer creates waves of big bass via its downward firing 8-inch woofer, bass port and robust 200 Watt amplifier. HDMI switching for both audio and video maximizes this home theater's high performance potential.

5.1 home theater with wireless sub

What Obsession Sounds Like

There's a fine line between loving music and being obsessed with it. When it comes to making music sound the best it can sound, we have a hard time believing that good enough is acceptable. It has to be flawless. Perfect. Uncompromising. In short, we think it would be crazy to give music anything less than everything it deserves.

Start with one, then add throughout your home

The W Studio is part of Definitive Technology's Wireless Collection which is an all-encompassing solution for distributing audiophile-grade music anywhere or everywhere in your home. Stream your favorite music services, internet radio and your personal digital music library all from your smartphone, tablet or computer.

Definitive Technology Apps

The free Definitive Technology App allows you to mix-and-match speakers with the open DTS PlayFi™ Technology standard and future-proof your home music solution. The Definitive Technology Utility App provides extended functionality, including product firmware updates, source selection (if applicable) and EQ settings for the W Amp and W Adapt.
